EDUCATION

Chennai Institute of Technology

B.E Computer Science and Engineering (AIML) (CGPA: 8.14/10)

Chennai, Tamil Nadu

2024 – 2028

EXPERIENCE

Soosai Hardwares

Aug 2026 – Sep 2026

Freelance Full-Stack Developer - React, Node.js, Express, PostgreSQL, JWT

- Independently built and deployed a **full-stack e-commerce catalog platform** (React, Node.js/Express).
- Built **category/brand filtering and search**, replacing checkout with a **WhatsApp-based order handoff** that matches how the business actually takes orders.
- Built a mobile-first **admin dashboard** with inventory CRUD and camera-based uploads, so the owner manages stock entirely from a phone without technical help.
- Secured REST APIs with **JWT**, **Helmet**, **CORS**, and **rate limiting**; **Cloudinary** for images, **PostgreSQL** for data.
- Deployed live at soosai-hardwares.vercel.app (Vercel + Render); took it from **unindexed to organic search** via sitemap and Search Console.

PROJECTS

NexMarket AI | AI Marketing Automation, Next.js, FastAPI, PostgreSQL, n8n, PyTorch, XGBoost

Sep 2026 – Present

- Building an end-to-end **AI marketing automation platform** that generates campaign content, evaluates posters, analyzes audience sentiment, predicts leads, and forecasts engagement through an automated campaign pipeline.
- Engineering a **FastAPI + PostgreSQL** backend and **Next.js** frontend integrating **Qwen**, **Stable Diffusion XL**, **DistilBERT**, **XGBoost**, and **PyTorch LSTM** models for content generation, sentiment analysis, lead scoring, and engagement forecasting.
- Implementing campaign orchestration with **n8n**, social publishing, analytics ingestion, and **provenance-aware training pipelines** that restrict model learning to verified real-world campaign data.

IntelliLearn | RAG, React, TypeScript, FastAPI, LangChain, FAISS, Llama 3.2, OCR

Nov 2025

- Built a **RAG study assistant** answering from uploaded documents via **FAISS search** and **Llama 3.2**.
- Built a **FastAPI** backend and **React** frontend with **OCR-based ingestion** (so scanned documents are searchable), chat history, and streaming responses.
- Supports uploading notes and PDFs, with **Sentence Transformers** embeddings powering semantic search and **citation-backed answers** grounded in the user's own documents.

MinuteMaster AI | NLP, Python, Whisper, React.js

Dec 2025

- Built an end-to-end pipeline using **OpenAI Whisper** and **NLP** to generate summaries, decisions, and action items.
- Designed a **React** interface to upload or record meetings and review **AI-generated notes**, removing the need for manual note-taking.
- Added **speaker identification** and meeting insights, using **LLMs** on a **FastAPI** backend to produce structured meeting documentation.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, Data Structures & Algorithms

AI & ML: Machine Learning, Deep Learning, NLP, Transformers, RAG

Libraries: PyTorch, Scikit-learn, OpenCV, NumPy, Pandas

Web & Backend: React.js, Next.js, JavaScript, Tailwind CSS, FastAPI, Node.js, Express.js, REST APIs

Databases & Tools: PostgreSQL, MongoDB, MySQL, Git, GitHub

COMPETITIVE PROGRAMMING

LeetCode: Contest rating of **1,712** (top **13%** globally). Solved **651** problems ([ajoe_2006](#)).

ACHIEVEMENTS

- Top 10 Finalist** at ReGen Hackathon 2.0 (Team Code Mavericks) for Smart Transportation, an AI accident prediction system using deep learning, ANPR vehicle tracking, and behavioral risk scoring.

CERTIFICATIONS

- Cisco CCNA: Introduction to Networks; Switching, Routing, and Wireless Essentials.
- AWS Cloud Practitioner Essentials.
- IBM Artificial Intelligence Fundamentals.
- Forge GenAI Powered Data Analytics Job Simulation.
- NPTEL Introduction to Internet of Things and Data Analytics with Python.
